DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 16-29, 31-43 and 46, drawn to a film bulk acoustic resonator with three electrodes and two wirings, classified in class 310, subclass 320.
- II. Claims 14, 30 and 44, drawn to a film bulk acoustic resonator with four electrodes and two wirings, classified in class 310, subclass 320.
- III. Claims 15, 31 and 45, drawn to a film bulk acoustic resonator on a substrate, classified in class 310, subclass 348.

The inventions are distinct, each from the other because of the following reasons:

Inventions of the three groups are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the inventions have different structures and thus have different effects and modes of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2834

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
